Muhammad Raditya Hanif

ferdar7@gmail.com | linkedin.com/in/muhammad-raditya-hanif

Backend Engineer experienced in Java, Spring Boot, AWS integrations, event-driven systems, databases, testing, and production support. Skilled in delivering backend features end-to-end, improving service reliability, and collaborating with cross-functional teams.

EDUCATION

Bachelor's Degree - Computer Science Aug 2021 – Jul 2025
University of Indonesia, Jakarta

EXPERIENCE

Software Backend Engineer Nov 2025 – Present
Traveloka, South Tangerang

- Developed and maintained backend features for Traveloka's Travel Activities Supply platform using Java and Spring Boot.
- Modernized AWS-based architecture integrations by migrating services from AWS SDK v1 to v2 across SQS, SNS, and S3-related flows, using feature-controlled rollout and self-testing to maintain backward compatibility.
- Improved system reliability and observability by adding metrics to Datadog, identified and optimized long-running SQL queries, and supporting production on-call investigations.

Full Stack Developer Aug 2025 – Nov 2025
PT Odoo Software Indonesia, Tangerang

- Develop and implement tailored solutions for clients across diverse industries, company sizes, and sectors, ensuring alignment with business needs.
- Analyze requirements and develop custom features on the company's cloud platform, improving client workflows and functionality.
- Support, maintain, and optimize existing solutions to guarantee stability and performance.

Backend Engineer Intern Feb 2025 – Aug 2025
PT Tumbuh Bersama Nano, Jakarta

- Enhanced application performance and scalability using Java + Spring Boot.
- Implemented caching with Redis, reducing response times.
- Integrated RabbitMQ to build event-driven, reliable service communication.
- Collaborated in refactoring and improving system functionality aligned with business growth.

Software Quality Assurance Intern May 2024 – Feb 2025
PT Global Tiket Network, Jakarta

- Create and maintain detailed, comprehensive and well-structured test cases using Testrail
- Report and manage bug reports and actively communicate with the team
- Do exploratory testing to find bug on multiple platforms
- Write and maintain automation test for API and Frontend using Java, Selenium, and TestNG

SKILLS

Java, Spring Boot**,** PostgreSQL, MongoDB, Redis**,** GCP, AWS, RabbitMQ, Git, Docker, Kubernetes, Elasticsearch, Grafana
